

GULF TECH G LINER

Product Description:

Gulftech G Liner is a high-quality, sheet metal alternative for constructing return air ducts between joists and stud cavities. This product consists of corrugated insulation faced with aluminum. Available in various widths, packed 25 to the box. Significantly reduces duct noises and labor. Requires no shop fabrication. Lightweight pre-cut Gulftech G Liner comes in various sizes. Staples easily and quickly to floor joists and stud cavities, saving on labor costs and providing a high-quality, professional finish.

Sizes available:

| Items No. | Size | Pcs/box |
|-----------|-------------|---------|
| GT1648JL | 16" x 48" | 25 |
| GT1948JL | 19.5" x 48" | 25 |
| GT2248JL | 22" x 48" | 25 |
| GT2448JL | 24" x 48" | 25 |

Installation:

The Gulftech G Liner panel end is either attached to the underside of the wood members, or a one inch section is bent to 90 degrees and attached to the vertical side of the wood member. The Gulftech G Liner panels are fastened to the wood studs or joists using minimum 3/8 inch long staples or roofing nails spaced 2 inches on center. The joints formed between Gulftech G Liner panels and return ducts, studs, joists or adjacent panels are sealed using 2 width aluminum tape. Butted panels are connected with a plastic connector, and taped.
